Age: 23

Nationality: Mendoza,
Argentina

Technical English (B1 -
Intermediate Reading)

ABOUT ME

Full Stack Developer with technical experience in the JavaScript ecosystem (Node.js, React, Nest.js) and Java Spring Boot. Specialized in optimizing operational processes through the development of custom web applications and automation solutions (RPA) using AutoHotkey. Strong academic background from UTN, with a proactive approach to cybersecurity and clean code practices. Focused on transforming business needs into efficient and scalable technical solutions.

TECHNICAL SKILLS

- Backend: Node.js + Express, Java Spring Boot, API RESTful, Prisma, JWT, Nest.js, Python.
- Frontend: React, TypeScript, Redux, REST API consumption, global state management.
- Databases: PostgreSQL, MySQL, MongoDB.
- Testing: Jest, Postman (API Testing).
- Dev Tools: Docker, Git/GitHub.
- Automation: AutoHotkey v2, GUI Automation.

EDUCATION

**UTN - UNIVERSIDAD TECNOLÓGICA
NACIONAL(NATIONAL TECHNOLOGICAL
UNIVERSITY)**

Higher Technical Degree in Programming
2023 - 2025 / Completed

PROJECTS

[FullStack TodoList](#)

Full Stack Todo List | Node.js, Express, React, MongoDB, TypeScript, Css, Responsive
End-to-end task management application featuring RESTful architecture, global state management, and responsive design.

[E-commerce Back:
Urban Vibes](#)

Ecommerce Backend (Urban Vibes) | Java, Spring Boot, Spring Security, JWT, MySQL
Development of a scalable backend with secure authentication and data persistence for an e-commerce environment.

[Pin Dispatch Automation](#)

Pin Dispatch Automation | AutoHotkey v2, GUI Automation
Optimization of operational workflows through visual automation and system event control, reducing manual errors.

WORK EXPERIENCE

DORIAL S.A.S. | Intelligence & Development Intern
Dec 2025

- Built a centralized web platform, improving data traceability and operational efficiency.
- Automated workflows using AutoHotkey v2 (RPA), reducing manual errors through image recognition and event handling.
- Improved system reliability by implementing validations and error handling in automation scripts.
- Collaborated in a 5-member Agile team, delivering iterative solutions to real business challenges.
